Better Civic Spaces Together

Smarter Cities Stronger Communities

THE PROBLEM

Civic Issues,Disconnected Responses

Scattered reporting

Complaints arrive through different channels, making them difficult to track together

Duplicate Complaints

Multiple reports about the same issue can create repetitive work.

Unclear Priorities

Urgent safety concerns may compete with routine maintenance requests.

Limited Visibility

Citizens may not know the status or progress of their complaints.

Better Civic Spaces Together

THE NUMBERS BEHIND

The Problem. Real Numbers.

Civic issues aren't just inconveniences — they have a real impact on people, safety and cities.

277
pothole-related road accidents

MP recorded 1,069 pothole-related road accidents and 277 deaths in 2024, according to figures reported to Parliament.

Source: Figures reported to Parliament (2024).

969
deaths

Reported pothole-related road fatalities in MP over five years. That's roughly one death every two days on average.

Source: State data (MP). Five-year period.

56,669
accidents

MP recorded 56,669 road accidents from all causes in 2024, according to state-wise data compiled from the Ministry of Road Transport and Highways. This is not a pothole-only figure.

Source: Ministry of Road Transport and Highways (2024).

62,528
leaks

A March 2026 news report citing the state Urban Administration Department reported 62,528 detected water leakages across 16 municipal corporations in MP.

Source: State Urban Administration Department (March 2026).

22–182
days

A CAG performance audit covering 2013–2018 found that examined leakage cases took between 22 and 182 days to be attended to in the two cities. This is historical data, not a current repair-time estimate.

Source: CAG performance audit (2013–2018).

These numbers highlight the scale of the challenge — and why a smarter, more connected solution is needed.

CivicSense — AI-Powered Civic Intelligence & Issue Resolution convert to text

-
-
- Large volumes of civic complaints about infrastructure issues.
- Duplicate reports and incorrect complaint categorization.
- Difficulty identifying urgent and high-risk problems.
- Inefficient allocation of resources and departments.
- Lack of recurring hotspot detection and effective tracking.
- Need for an intelligent system to prioritize complaints and improve resolution.

Our solution — One platform, smarter action

Core Features of CivicSense

- **Easy Reporting:** Submit complaints with a description, photo, and location.
- **AI-Powered Classification:** Automatically identify the type of issue.
- **Duplicate Detection:** Identify similar complaints in nearby areas.
- **Smart Prioritization:** Rank issues based on severity and urgency.
- **Automatic Department Routing:** Forward complaints to the relevant department.
